**ELECTRONIC BULLETIN:**

October 23, 2009

To: All Residents  
Subject: Masonry Repair Project  
Location: 5316 S. Dorchester

I am writing to provide an update on the Masonry Repair Project that I previously wrote about on September 14<sup>th</sup>, 2009.

- Work to rebuild the north and south courtyard parapet walls is complete.
- Work has begun to repair brick at the lobby and front vestibule,
- Window lintel repairs at approximately five locations are expected to resume next week.
- All work is expected to be complete by Friday, October 30, 2009 weather permitting.

We will provide updates as additional information becomes available. As always your janitor, and our project team, will do their best to ensure a problem free project.

Please feel free to contact me should you have any questions about this important building improvement project.

Regards,

Eric Boyle
